Temperature logger -40 - +80°C for refrigerated counters, food transport, EN12830 approved. Waterproof, Internal sensor. Battery

FEATURES

Verify that e.g. goods transport has had the desired temperature
Suitable for quality documentation
Super robust design - for harsh environments
Place the data logger next to the item and let it document the transport
EN12830 approved for food
Memory for 16,000 measurements with date and time
Measuring interval: from 1 second to 1 hour
Log data is transmitted optically to the Data Collector
Find Data Collector under Accessories
No physical connection - thus IP67
Free presentation software, tools and Cloud
LCD display and LED alarm when the limit is exceeded
Measuring range: -40 - +80°C +/-0.5°C accuracy
Battery operating time: 2 - 4 years
Dimensions and weight: 62 x 47 x 19 mm, 45 grams
Battery: 1 x LS14250

SPECIFICATIONS

Andet	:	LOG51S+ er IP67 tæt. For at hente målingerne fra LOG51S+ skal LOG50U-M eller LOG57U-M baseenheden anvendes.
Forsyning	:	Batteri
Kalibrering	:	1 og 2 punkts
Måleområde	:	- 40 – 80 °C via intern føler
