

LOG-WL507

2 Channel temperature, humidity log -25 - +70°C, 0 to 99%RH. Wireless to Data Collector 150m, combi sensor. IP64. battery

FEATURES

Wireless Temperature and moisture præsicions logger with memory

Sending measurement data to Data Collector (Base Station) at 870MHz

Distance between Data Logger and Data collector up to 150 meters

Battery operation up to 10 months at an upload per day

Data Logger is not on-line

 $2 \times 8,000$ measurements in memory with the date and timestamp

Accuracy of measurement: max. + / - 0.3 ° C range depending

Removable external sensor. Close O-ring Free Cloud service: TD WebStorage for Data Collector

LCD display shows current measurements PC software: tools and presentation included Data Logger setup with Data Collector Optical

Dimensions: 62 x 47 x 19 mm

Fixed antenna: 24 mm Battery type: LS14250 x 1
