

1-wire temperature sensor, -40 - + 85 ° C, box with 2 x RJ11. Cascading. Dallas chip, wall mount FEATURES

- Temperature sensor with Dallas chip - up to 8 pieces on the same bus
- 1-wire communication to the measuring electronics
- With connector for cascade coupling to the next sensor
- ±0.5°C accuracy from -40°C to +85°C
- 12 bit resolution
- Temperature sensor in the box
- Very low power consumption
- Each device has a unique 64 bit serial number
